

**INCREDIBLE BULK LTD.
EXCELSIOR GLOBAL LTD.**

ETHOS

Incredible Bulk was founded in 2015 and Excelsior Global in 2023. Excelsior was founded as a partnership and sister company to Incredible Bulk to further bolster growth in the Caribbean and Latin America (Central and South America). Utilising the partners expertise in shipping, logistics, materials handling and decades long relationships, Excelsior has brought new markets in bulk shipping in Mexico, USA, Jamaica and Guyana calling for the inclusion of 50,000 ton plus vessels and barges to adequately service the region. All supply contracts are by design multi year and multi million dollar.

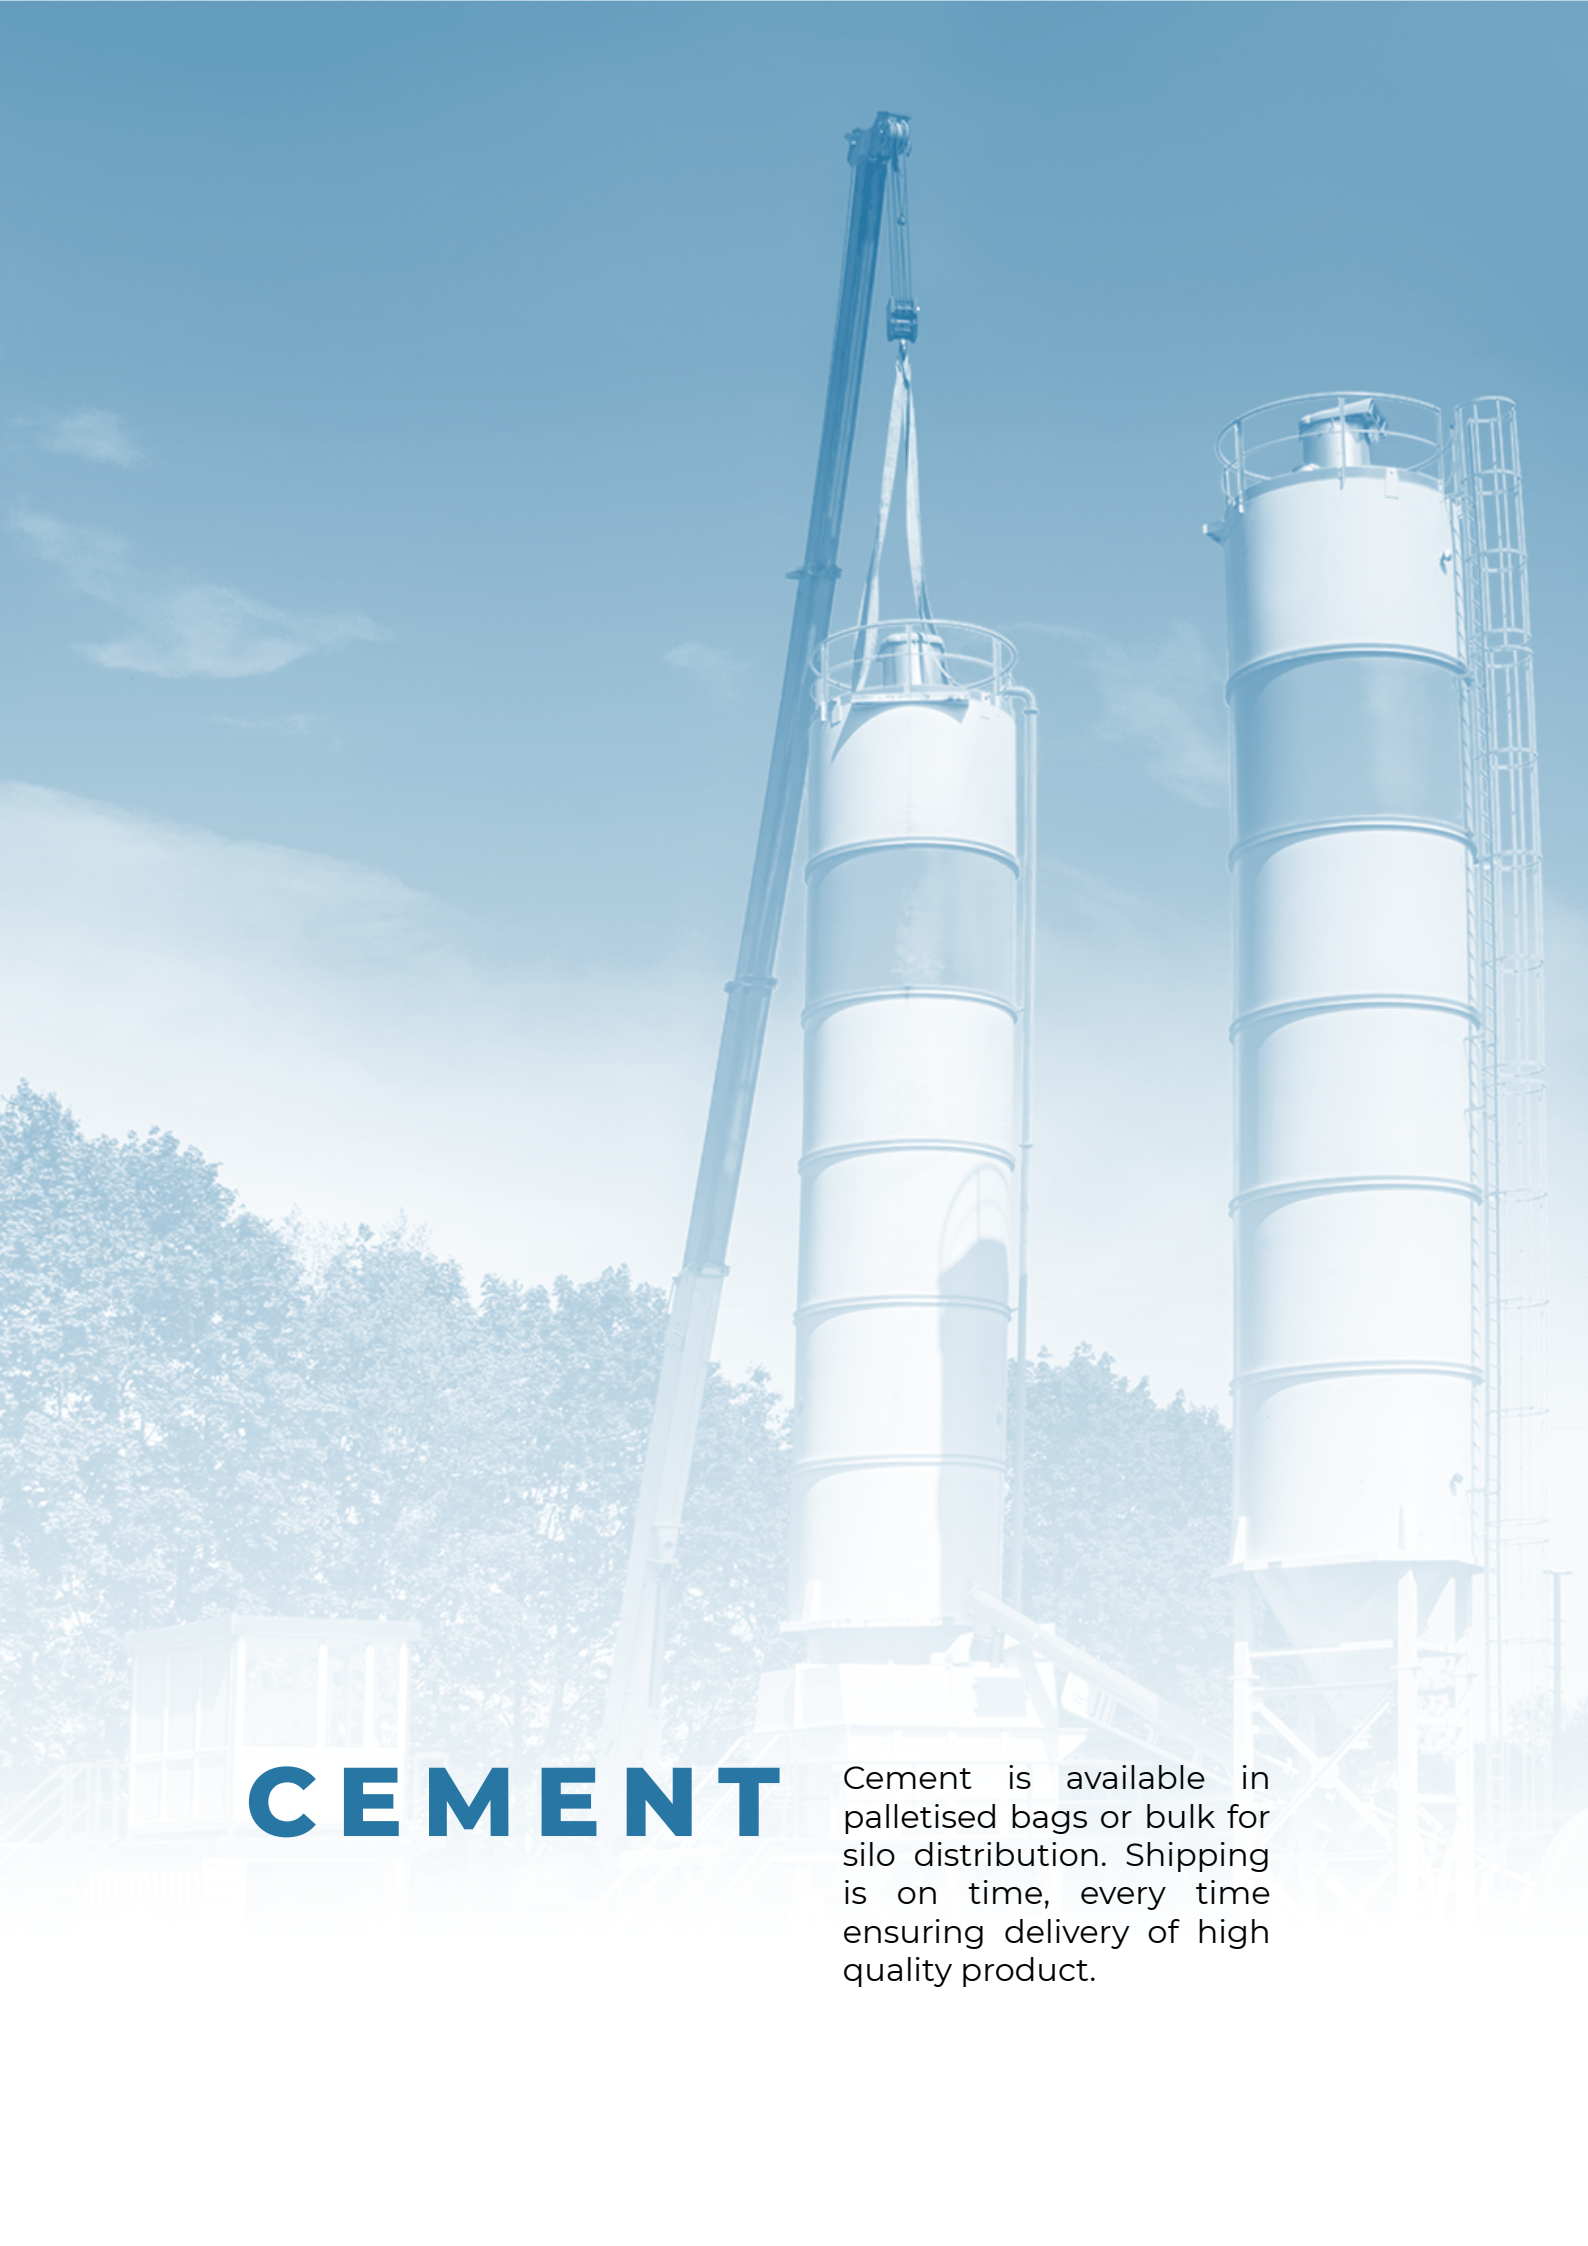

Presently, we are one of the fastest growing construction supplies distributors and shippers in the region, with the second largest privately owned fleet. Our basic function is to source, ship and distribute construction supplies for service retailers, construction companies and government projects. In all instances we aim to eliminate dead legs by returning from delivery with a full load for distribution in the caribbean basin and LatAm. Our solution is turn key, offering supply, shipping, and delivery to port, all under one umbrella.

AGGREGATE

We offer aggregate of all sizes in limestone or volcanic origin, suitable for ready mix, railway construction, asphalt work, foundation work etc. our supply is presently capable of 50,000 + tons per day and originates in the Caricom region thus mitigating taxation.

Our high-quality aggregates, sourced from quarries and marine deposits, deliver the strength and volume your projects need.

CEMENT

Cement is available in palletised bags or bulk for silo distribution. Shipping is on time, every time ensuring delivery of high quality product.

OIL & GAS

In short order we will take delivery of our first oil and gas tanker, a 405', 16,770 ton vessel operating entirely in the caribbean region and Gulf of Mexico.
